REASONS FOR ALLOWANCE

1. Claims 1-21 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Claim 1 is allowable over the prior art for at least the reason that the prior art fails to teach or reasonably suggest, "the filter shape precisely matches a spectrum of a substance; and the holographic filter is used to detect the substance by allowing the spectrum matching the multiple peaks to pass through the filter simultaneously onto a detector" as set forth in the claimed combination. Claims 2-7 are also allowable based upon their dependence on claim 1.

Claim 8 is allowable over the prior art for at least the reason that the prior art fails to teach or reasonably suggest, "a filter shape with multiple peaks at specified positions that precisely matches the spectrum of a substance; and detecting the substance using the volume holographic medium as a filter by allowing the spectrum matching the multiple peaks to pass through the filter simultaneously onto a detector" as set forth in the claimed combination. Claims 9-14 are also allowable based upon their dependence on claim 8.

Claim 15 is allowable over the prior art for at least the reason that the prior art fails to teach or reasonably suggest, "a filter shape with multiple peaks at specified positions that precisely matches the spectrum of a substance; and means for detecting the substance using the volume holographic medium as a filter by allowing the spectrum matching the multiple peaks to pass through the filter simultaneously onto a detector" as

set forth in the claimed combination. Claims 16-21 are also allowable based upon their dependence on claim 15.

The prior art of record, Jannson et al teaches a holographic filter comprising multiple holograms within a volume hologram, which rejects a particular spectral band. However, the prior art of record does not teach that a filter shape with multiple peaks precisely matches a spectrum of a substance and that the holographic filter is used to detect the substance by allowing the spectrum matching the multiple peaks to pass through the filter simultaneously onto a detector and there is no motivation or teaching to modify this difference as derived.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
